B.Tech in Computer Science engineering
MKSSS'S Cummins College of engineering for woman

May 2028

PROJECTS

Smart Agriculture Spraying Robot Simulation | Java, Data Structures & Algorithms, OOP:

Developed a Java-based agricultural robot simulation that autonomously navigates a grid-based field using BFS pathfinding to spray crops while avoiding obstacles. Implemented custom queue-based traversal, battery and chemical management, and a modular object-oriented design to simulate efficient and automated crop spraying.

Driving License Management System:

Developed a Java-based desktop application using Java Swing, JDBC, and MySQL to automate the driving license application process with role-based access for applicants and RTO employees, featuring registration, document verification, test scheduling, payment processing, application tracking, and license issuance.

SkyLux Airlines – AI-Powered Flight Booking Platform:

Built a full-stack airline booking system using Python, Streamlit, MySQL, and scikit-learn, featuring an ML model (Random Forest) for customer segmentation and travel frequency prediction, dynamic loyalty-based pricing, an AI chatbot (Luna) via OpenRouter API, and automated PDF boarding pass generation.

SKILLS

Languages: Python, C++, SQL, Java

Technologies: HTML, CSS, MySQL

Libraries/Tools: Pandas, NumPy, Scikit-learn, Git, GitHub, VS Code

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems

AI/ML: Machine Learning, Prompt Engineering
